

Dear Student,

Greetings from SmartBridge,

Your team has successfully enrolled for the project.

Please find the team details below

Team ID : NM2023TM1003280

Team Size : 4

Team Leader: YASMEEN L

Team member: Pallavi.s

Team member: VIMALA S

Team member: MEENA I

Regards,

Team SmartBridge

Formatting axes and annotations in Tableau is an important step in creating clear and effective visualizations. Axes provide context for your data, while annotations help to explain the significance of specific data points or trends.

The screenshot shows a video player interface with a dark theme. At the top, it says "Format Axis And Annotations - 2". Below the title, there's a "Smart Internz" logo. The main content area displays a Tableau dashboard featuring a bar chart. A red arrow points to the "Annotations" section of the dashboard, which contains several text boxes explaining how annotations work. At the bottom of the video player, there's a progress bar showing "26:50 / 26:51", a "YouTube" button, and a "Complete and Continue" button.

The screenshot shows the Tableau software interface. On the left, there's a sidebar with various icons and a search bar. The main area is titled "Dashboard pane". It displays a preview of a dashboard with several cards and a play button in the center. Below the preview, there's descriptive text: "In the window where we can create our dashboard, we get a lot of tabs and options related to dashboarding. On the left, we have a Dashboard pane which shows the dashboard size, list of available sheets in a workbook, objects, etc." At the bottom of the video player, there are controls for volume, playback time (1:04:02 / 1:04:03), closed captions (CC), settings (gear), and sharing (YouTube icon).
